Modular System

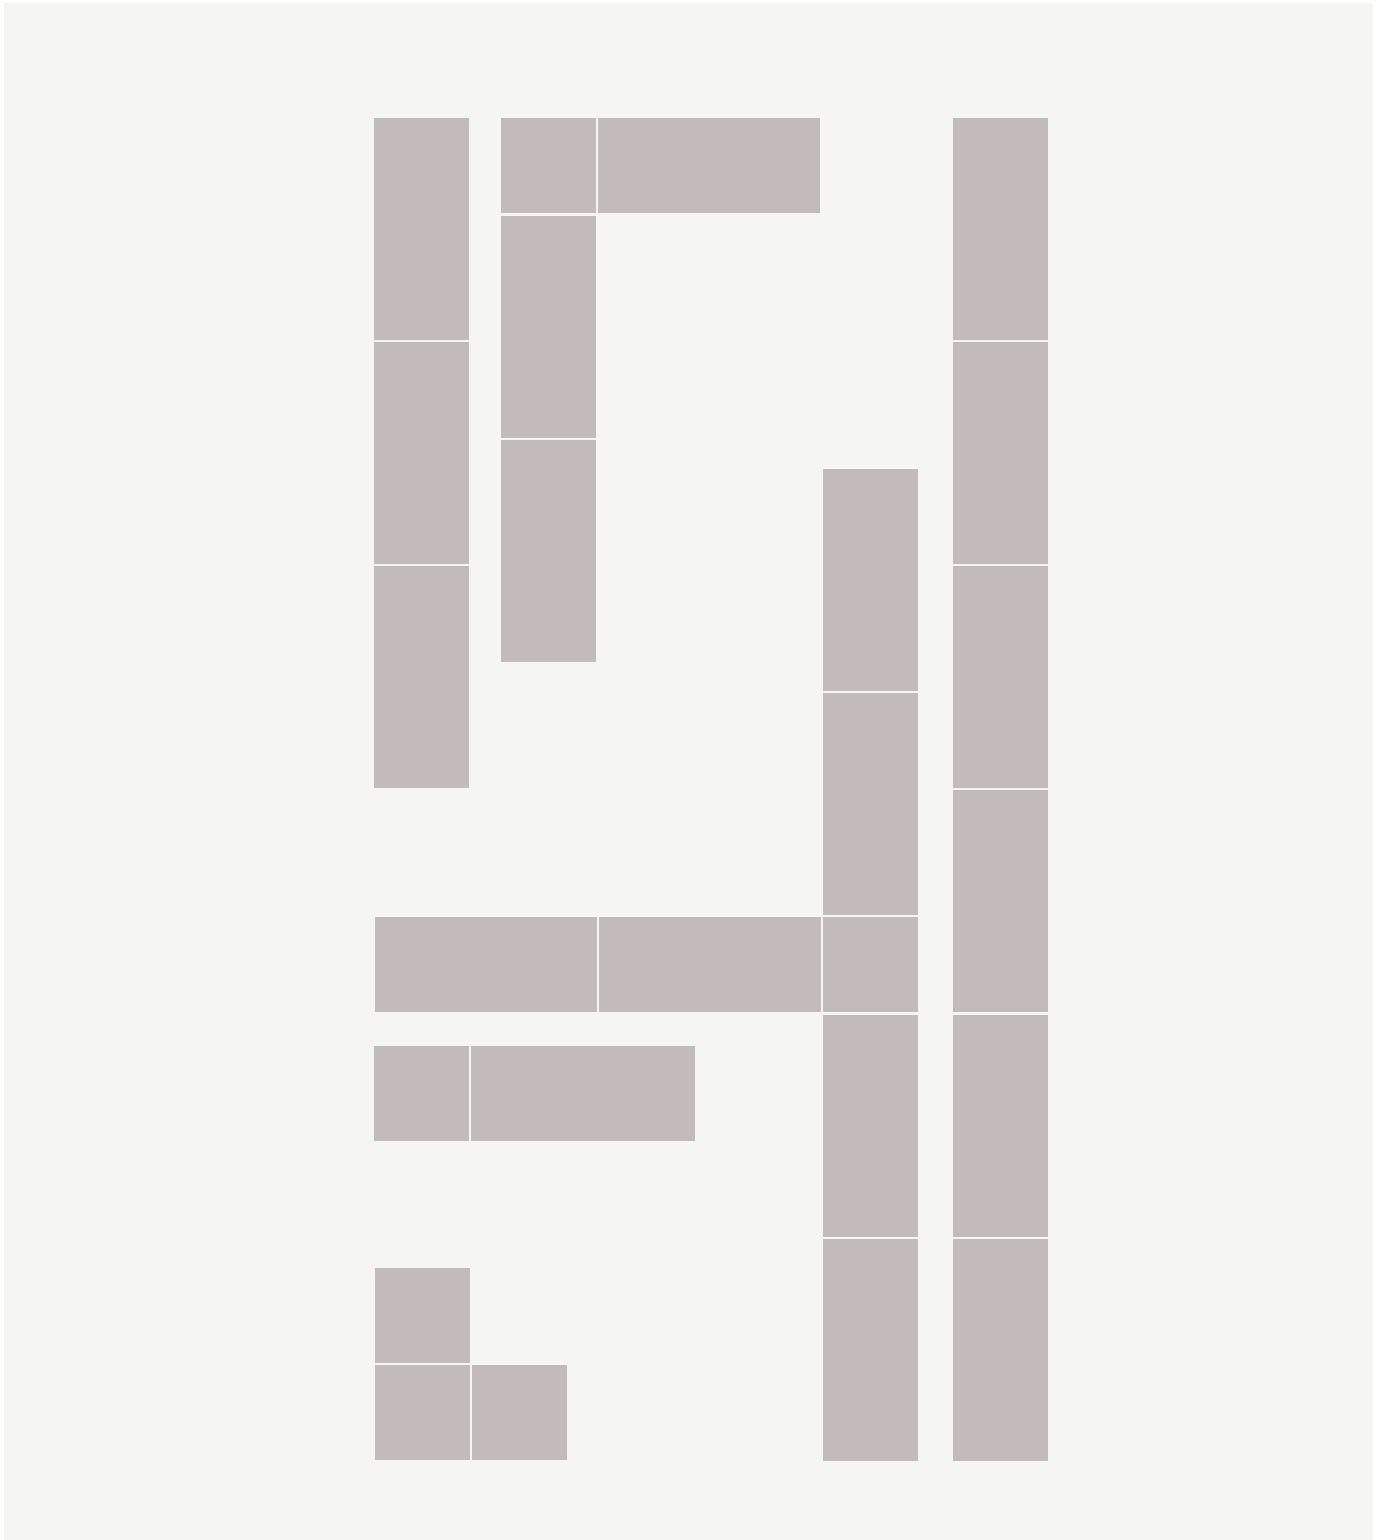

—2024 Collection

Metal Planter Modular System, with models of different heights, depths and lengths, offers the possibility to create individual, line and corner compositions, without dimensional limits.

herstera®

Unlimited Modularity

— Create individual, line and corner compositions, without dimensional limits.

E-Commerce Ready

—2024 Collection

Products to sale online,
packaged in such a way that only
have to be delivered and reach
your end customer in the most
efficient way.

Hot dipped galvanized steel powder-coated

www.habyoutdoor.com

New Coating System

— outdoor life collection

Metal Planter collection is made of hot-dipped galvanized steel sheet and powder coated. This double treatment guarantees that articles will have a long durability in outdoors.

Hot Dipped Galvanized

Metal sheet is treated by a hot-dip galvanizing process to ensure high resistance to corrosion.

Primer Layer

Ensures Powder Coating adherence and provides extra protection against corrosion.

Powder Coating

Polyester base powder coating is applied to the metal parts. The pieces are cured under heat in an oven.

Stainless Steel Hardware

Lifetime guarantee against corrosion

Mild Steel

— Base Material

Hot Dipped Galvanized

Sustainability

— outdoor life collection

We seek good design through products that combine sustainability, shape, function, quality and authenticity. We work diligently to find new ways to reduce our impact.

No solvents used

Long lasting lifespan

No VOCs emission during painting process

Repairable products

Spare parts available

Space optimisation

We are committed to flat packaging allowing the optimisation of space in any logistics centre and reducing transportation. Long-lasting products

Long-lasting products

Enduring designs with enduring appeal, capable of defying any temporary trend.

Planters that give life

Planters introduce nature into any space and contribute to improve the air and contribute to the recovery of pollinating insects

Kiri Solid Wood

—from **sustainable** plantations

Exclusive Solid Wood

Kiri wood, also known as Paulownia wood, has a long-standing traditional significance in Japan. The Kiri tree has been highly valued for its exceptional properties and versatility. It was favored by the aristocracy and nobility for various purposes, including the crafting of fine furniture, musical instruments, and decorative items. The wood's lightweight nature, combined with its strength and resistance to cracking, made it a preferred material for creating delicate and intricate pieces.

Weather Resistance

Paulownia wood combined with outdoor oil treatment, excels in outdoor applications, boasting exceptional resistance to harsh weather conditions and prolonged exposure.

Structural Solidity

Renowned for its remarkable strength-to-weight ratio, Paulownia wood ensures sturdy and reliable constructions without compromising on its lightweight nature.

Sustainable Choice

Embrace eco-consciousness with Paulownia's rapid growth and replenishable properties, making it a sustainable option for responsible resource management.

Ally Against Climate Change

The fast-growing nature of paulownia means it has a high capacity for absorbing carbon dioxide (CO₂) from the atmosphere during its growth phase, twice as much than pine wood. When harvested and used as wood, a significant amount of carbon is trapped in wood products, helping to mitigate climate change.

Timeless Elegance

The captivating beauty of Paulownia's elegant grain patterns and smooth finish, adding a touch of sophistication to any space.

Versatile Advantages

From furniture to boat building, Paulownia wood's versatility shines, offering ease of workability and a wide range of applications, making it a top choice.

FSC Manufactured

The production of Paulownia solid wood panels meets the criteria set forth by the Forest Stewardship Council.
